1. SMART PLACEMENT PORTAL

1. User Management

1.1. Authentication & Authorization
- Student, Admin, Company HR, Coordinator login
- OAuth/Social login (Google, LinkedIn)
- Role-based access control

1.2. Profile Management
- Students: Academic details, skills, certifications, resumes, preferences
- Companies: Job descriptions, hiring criteria, schedule
- Coordinators: Assign batches, manage drives

2. Student Dashboard

2.1. Personalized Dashboard
- Profile completeness tracker
- Upcoming interviews, deadlines
- AI-based job match suggestions

2.2. Resume Builder (Optional)
- Smart resume templates
- Auto-fill from profile
- Keyword enhancement using AI

2.3. Application Tracker
- Track applied companies
- Status updates: Shortlisted, Rejected, Interviewed, Selected

3. Company Dashboard

3.1. Job Posting Management
- Create/edit job openings
- Set eligibility criteria (CGPA, branch, skills)
- Upload JD and company brochures

3.2. Candidate Shortlisting
- Auto-filter based on criteria
- AI-based ranking based on skills/fitment
- View student profiles and resumes

4. Placement Coordinator Tools

4.1. Schedule Management
- Calendar view of drives
- Interview panel management
- Email & notification system

4.2. Batch and Group Management
- Assign students to placement batches
- Tagging students with eligibility labels (e.g., "Core", "IT", "Super Dream")

4.3. Reports and Analytics

- Placement statistics (branch/company-wise)
- Exportable reports (PDF, Excel)
- AI insights: Skill gaps, average package, trends

5. Intelligent Matching Engine (AI/ML)

5.1. Job Recommendation System
- Match jobs based on student profile (skills, history, preferences)
- Collaborative filtering and NLP for JD parsing

5.2. Predictive Analysis
- Predict chances of selection
- Identify top-performing students

5.3. Resume and Profile Scoring
- NLP to assess resumes for quality and keyword match
- Suggest improvements

6. Testing & Assessment Module

6.1. Test Platform Integration
- Aptitude, technical, coding tests
- Integration with HackerRank, Codility, etc.

6.2. Custom Test Creation
- Create MCQs, coding, and psychometric tests
- Auto-evaluation and result publishing

6.3. Interview Simulation
- AI-powered mock interview bots
- Feedback and suggestions for improvement

7. Communication Module

7.1. Notifications
- Email, SMS, in-app notifications
- Event reminders, result alerts

7.2. Chatbot Assistant
- FAQ support
- Job-related queries
- Real-time support for students and recruiters

8. Analytics & Reporting

8.1. Admin Analytics Dashboard
- Real-time stats: Placement ratio, average salary, branch-wise metrics
- Drill-down view by student or company

8.2. Student Progress Reports
- Skill development tracking
- Placement readiness meter

8.3. Company Insights
- Past engagement history

- Feedback from interviewers

9. Admin Panel
  9.1. Master Data Management
  - Departments, branches, academic years
  - Company database
  9.2. Drive Management
  - End-to-end drive workflow
  - Post-drive feedback collection
  9.3. System Configuration
  - Permissions, thresholds (CGPA, max offers)
  - Branding and themes

10. Security & Compliance
  10.1. Data Protection
  - GDPR/FERPA compliance
  - Data encryption (at rest and in transit)
  10.2. Audit Logs
  - Track user activity
  - Error and performance logs
  10.3. Backup & Recovery
  - Auto backup of all critical data
  - Disaster recovery plans

11. Integration Layer
  11.1. APIs for External Systems
  - University ERP
  - Job portals (LinkedIn, Naukri, etc.)
  - LMS (Moodle, Canvas)
  11.2. Third-Party Services
  - Payment gateway (for certification drives)
  - Calendar sync (Google Calendar, Outlook)

12. Future Enhancements (Optional AI/ML + Blockchain)
  12.1. Blockchain-based Credential Verification
  - Secure certificate issuance
  - Tamper-proof employment history
  12.2. AI Career Advisor
  - Personalized learning paths
  - Course and certification recommendations

----

2. SMART COLLEGE EVENT MANAGEMENT PORTAL

1. User Management

    1.1. Authentication & Access Control
- Roles: Admin, Event Organizer, Faculty, Student, Guest
- Standard login/password (optional SSO: Google)
- Role-based dashboard access

    1.2. Profile Management
- Student: Name, roll number, branch, contact info
- Faculty: Designation, department
- Organizer: Assigned events
- Guest: Optional registration

2. Dashboard & User Interface

    2.1. Personalized Dashboards
- Students: Registered events, certificates, announcements
- Organizers: Events managed, tasks, volunteer list
- Admin: All event summaries, pending approvals, reports

    2.2. Notifications & Announcements
- Email and in-app notifications
- Event updates, reminders, result announcements

3. Event Lifecycle Management

    3.1. Event Creation & Approval
- Submission form: Title, date, venue, budget, description
- Multi-step approval by faculty/admin
- Rejection/feedback mechanism

    3.2. Event Categorization
- Types: Academic, Technical, Cultural, Sports, Social
- Filters: Department-wise, inter-college, online/offline

    3.3. Scheduling & Calendar Integration
- Global calendar view
- Manual conflict checking (date/venue)
- Admin tools to modify or cancel events

4. Event Registration System

    4.1. Participant Registration
- Open or invite-only registration
- Individual/team options
- QR code or manual check-in

    4.2. Payment Integration (Optional)
- Paid event ticketing
- UPI, Paytm, or Razorpay gateway
- Receipts & payment history

4.3. Certificate Management
- Upload or auto-generate certificates
- PDF export, email delivery
- Option to include QR for verification

5. Volunteer & Task Management
5.1. Volunteer Enrollment
- Volunteer sign-up form
- Event-wise role assignment (registration desk, logistics, tech support)
5.2. Task Assignment & Progress Tracking
- Create tasks with deadlines
- Assign to organizers or volunteers
- Mark as pending, in progress, completed

6. Resource & Venue Booking
6.1. Venue Management
- Venue list with capacity & features
- Manual booking requests
- Conflict checking by admin
6.2. Equipment/Inventory Booking
- Request for items like projectors, banners, mic, chairs
- Issue and return tracking
- Damage/loss record

7. Content & Media Management
7.1. Event Microsites or Pages
- Event overview, schedule, speaker list
- Image gallery, downloadable resources
- Social share buttons
7.2. Media Uploads
- Upload post-event photos and videos
- Public view or participant-only access

8. Communication Module
8.1. Bulk Communication
- Email and SMS blasts for event promotion
- Event reminders to registrants
8.2. Chat/Forum (Optional)
- Limited discussion area for participants
- Event-specific Q&A boards

9. Reports & Analytics
9.1. Event Statistics
- Number of participants, departments involved

- Budget vs actual spending
- Total events per semester/year

9.2. Feedback & Evaluation
- Feedback forms for attendees and volunteers
- Ratings for event quality and organization

9.3. Exportable Reports
- Excel or PDF reports
- Organizer performance, participation trends

10. Admin Panel
10.1. User & Role Management
- Add/edit/remove users
- Assign roles to organizers and faculty

10.2. Event & Category Management
- Create and manage event types
- Manage sponsor and guest databases

10.3. Budget & Sponsor Management
- Event budget planning and approval
- Manage sponsor details, benefits, and financials

11. Security & Compliance
11.1. Data Protection
- Secure login with encrypted credentials
- Access restrictions based on roles

11.2. Logs & Audit Trail
- User activity logs (event creation, changes)
- Record of approvals and budget changes

11.3. Backup & Restore
- Regular database backups
- Admin panel for restoring deleted items

12. Integration Layer
12.1. ERP or Student Management System
- Import student data for verification
- Sync with attendance or academic modules (optional)

12.2. External Tools
- Zoom/Google Meet for virtual events
- Integration with Google Calendar or Outlook

----

3. ONLINE MOCK INTERVIEW PREPARATION PLATFORM

1. User Management

1.1. Authentication & Authorization
- Signup/login (Email, Google/Facebook OAuth)
- Roles: Candidate, Interviewer (optional), Admin
- Profile creation: Name, skills, experience, job role interests

1.2. User Dashboard
- Candidate: Scheduled mock interviews, past results, feedback
- Admin: User management, question bank management, analytics

2. Interview Module

2.1. Question Display Interface
- Display interview questions on screen (text-based)
- Question types: Behavioral, Technical, HR, situational
- Timer per question with countdown

2.2. Voice Recording & Response Capture
- User answers by speaking into mic
- Real-time voice recording triggered by "Start" button
- Visual indicator of recording status
- Option to pause/re-record answer before submission

2.3. Playback & Review
- Allow candidate to playback their recorded answer
- Option to re-record or submit final answer

3. Question Bank & Interview Scripts

3.1. Question Categorization
- Categories: Technical (coding, domain-specific), HR, Behavioral, Situational
- Difficulty levels: Easy, Medium, Hard

3.2. Interview Templates
- Pre-built mock interviews based on job roles (Developer, Manager, Sales, etc.)
- Customizable interview sequences by admin or interviewer

3.3. Admin Question Management
- Add/edit/delete questions
- Bulk upload via CSV or Excel
- Tagging and search capability

4. Answer Processing & Feedback

4.1. Automated Speech-to-Text Transcription
- Convert candidate's voice answer to text using speech recognition (Google Speech API, Azure Speech Services)
- Display transcript for candidate review

4.2. Basic NLP Analysis (Optional)
- Keyword match against ideal answers

- Fluency, filler word detection, pauses (basic scoring)

4.3. Manual Feedback (Optional)

- Interviewers or coaches can listen to recorded answers and give feedback
- Comment section per question/answer

5. Interview Scheduling & Notifications

5.1. Booking System

- Candidates can schedule mock interviews (live or self-paced)
- Time zone support

5.2. Reminders & Notifications

- Email and push notifications for upcoming sessions
- Post-interview feedback reminders

6. Performance Dashboard & Reports

6.1. Candidate Performance Overview

- Summary of answers, scores, feedback
- Progress tracking over multiple sessions

6.2. Detailed Analytics

- Strengths and weaknesses by category
- Time taken per question, speaking duration
- Trends across interviews

6.3. Export & Sharing

- Downloadable reports (PDF)
- Share results with mentors or recruiters

7. Technical & UX Features

7.1. Real-Time Recording & Playback

- WebRTC or MediaRecorder API for audio capture in browser
- Low latency UI for smooth user experience

7.2. Responsive Design

- Works on desktop and mobile browsers

7.3. Accessibility

- Keyboard navigation support
- Clear UI/UX for all users

8. Admin Panel

- Manage users, question bank, interview templates
- View usage statistics, platform health
- Manage subscription plans/payments (if monetized)

9. Security & Compliance

- Secure user data & recordings
- GDPR compliance for data privacy
- SSL encryption and secure storage of audio files

10. Optional Advanced Features (Future)

- AI-based scoring & feedback with deep NLP
- Video recording and facial expression analysis
- Live interview with interviewer interaction
- Integration with job portals or LinkedIn for direct application

----

5. SMART COLLEGE HOSTEL MANAGEMENT SYSTEM

1. User Management

1.1. Authentication & Roles

- Secure login with roles:
  - **Admin:** Overall management
  - **Warden:** Block/floor-level management
  - **Student:** Room status, applications, services
  - **Staff:** Cleaning, maintenance, security
- Optional: SSO or integration with college ERP

1.2. Profile Management

- Student: Name, roll number, branch, contact, guardian details, blood group
- Warden: Assigned block, contact details
- Staff: Assigned duties, schedule

2. Room & Hostel Allocation

2.1. Hostel Blocks & Room Setup

- Add/manage blocks, floors, rooms
- Define room types (single, double, triple sharing)
- Track occupancy, availability

2.2. Room Allotment Process

- Online application form with preferences
- Auto or manual allotment
- Room change request and approval workflow
- Waiting list and priority handling (final year, merit, etc.)

2.3. Allotment History

- Track current and past room allocations
- Roommate history
- Transfer logs

3. Fee Management

3.1. Fee Structure Setup

- Hostel fee slabs by room type, category (SC/ST, general, NRI)
- Mess fee, deposit, fines

3.2. Online Payment Integration

- Payment gateway (Razorpay, Paytm, Stripe)
- Fee receipts, due reminders

3.3. Fee Tracking
- Paid, due, partial payment statuses
- Defaulter list generation
- Refund handling for withdrawals

4. Complaint & Maintenance System
4.1. Issue Logging
- Students log issues: plumbing, electricity, Wi-Fi, cleanliness, etc.
- Attach photos, choose priority
4.2. Complaint Assignment & Tracking
- Auto-routing to staff or contractors
- Status tracking: Pending → In Progress → Resolved
- Feedback on service quality

5. Visitor Management
5.1. Visitor Registration
- Visitor entry with photo ID, purpose, student reference
- In-time and out-time tracking
5.2. Visitor Logs
- Searchable database of all visitors
- Alerts for unauthorized or overstay cases

6. Mess Management
6.1. Menu Management
- Daily/weekly mess menu visible to students
- Menu suggestion feature
6.2. Attendance Tracking
- Optional: QR or biometric check-in for meal tracking
- Auto deduction for no-shows (optional)
6.3. Feedback & Ratings
- Students rate food, hygiene, service
- Analytics for mess improvement

7. Leave & Gate Pass Management
7.1. Leave Application
- Students request leave with reason and guardian consent
- Warden approval flow
7.2. Outpass/Gatepass
- Day-pass and overnight pass options
- Entry/exit tracking via gate security dashboard

8. Reports & Analytics
8.1. Admin Dashboard
- Live stats: room occupancy, issues, fees collected

- Visual charts and graphs

8.2. Hostel Performance Metrics
- Complaint resolution rate
- Mess satisfaction score
- Fee defaulter trends

8.3. Exportable Reports
- Excel/PDF: Room list, fee ledger, complaint history

9. Communication & Notifications

9.1. Email Alerts
- Room allotment updates
- Fee due/overdue reminders
- Emergency alerts (fire drill, water outage, etc.)

9.2. Broadcast Messages
- Warden/admin can send notice to specific blocks or all hostellers
- Attach files, circulars, or meeting invites

10. Security & Compliance

10.1. Role-based Access Control
- Only authorized users can view/edit sensitive data

10.2. Data Backup & Recovery
- Regular automated backups
- Admin panel for recovery

10.3. Compliance & Privacy
- GDPR/institutional policy compliance
- Secured database with encryption at rest & transit

11. Optional Modules

11.1. Web App
- Room status, mess menu, complaints, notifications
- QR code for attendance or gatepass

11.2. Biometric/Smart Card Integration
- Hostel entry logging
- Mess and room access control

11.3. Inventory & Stock Management
- Furniture, appliances tracking per room
- Issuance and return log (bed, mattress, keys)

12. Integration Layer

12.1. College ERP/Student Management System
- Sync student data and admission status

12.2. Financial System Integration
- Hostel fee data syncing with accounting software

----

6. PERSONAL FINANCE TRACKER

1. User Management
1.1. Authentication & Security
- Sign up/login (Email, Google, Apple ID)
- Two-factor authentication (2FA)
- Encryption of financial data

1.2. Profile Setup
- Name, currency preference, country
- Monthly income sources
- Financial goals (optional)

2. Dashboard Overview
2.1. Summary View
- Current account balance
- Monthly income vs. expenses
- Savings rate and debt-to-income ratio

2.2. Visual Insights
- Pie charts for expense categories
- Line/bar charts for income/expense trends
- Net worth over time

3. Income Tracking
3.1. Income Categories
- Salary, freelance, passive income, gifts, etc.
- Customizable categories

3.2. Recurring Income
- Set monthly recurring incomes
- Notifications for expected payments

4. Expense Tracking
4.1. Expense Categories
- Essentials: Rent, groceries, utilities
- Lifestyle: Travel, dining, subscriptions
- Custom categories & tags

4.2. Input Methods
- Manual entry (quick add)
- Upload bank/credit card statements (CSV/PDF parsing)
- OCR support (optional) for receipts

4.3. Recurring Expenses
- Subscriptions (Netflix, Spotify)
- Bills (rent, electricity, internet)
- Auto-debit alerts and reminders

5. Budget Management

    5.1. Monthly Budgeting
- Allocate budgets per category
- Track overspending in real time

    5.2. Envelope System (Optional)
- Budget envelopes for categories
- Visual depletion as money is spent

    5.3. Budget Rollover
- Option to carry over unused budget
- Alerts for exceeded limits

6. Savings Goals

    6.1. Goal Setup
- Define goal name, amount, target date (e.g., "New Laptop - $1500 in 6 months")
- Set auto-savings rules (e.g., $100/week)

    6.2. Goal Progress Tracker
- Track % completion
- Visual progress bar or tracker

7. Debt Management

    7.1. Loan Tracking
- Add loans: Education, car, credit card, mortgage
- EMI amount, interest rate, due dates

    7.2. Repayment Schedule
- Monthly calendar view of payments
- Total interest paid, remaining principal

    7.3. Debt Payoff Strategies (Optional)
- Snowball or avalanche method planning

8. Reports & Analytics

    8.1. Monthly Reports
- Downloadable PDF/Excel summary
- Month-to-month comparisons

    8.2. Trends & Insights
- Income and expense heatmaps
- Best/worst spending habits
- Yearly overview

9. Reminders & Notifications

    9.1. Smart Alerts
- Bill due reminders
- Overspending or budget breach alerts
- Goal updates

    9.2. Weekly/Monthly Summaries

- Email or in-app summary report
- Optional push notifications

10. Data Import & Export
10.1. Import Options
- CSV, Excel, bank integration (via APIs or Plaid-like tools)
10.2. Export Options
- Export reports in PDF/CSV for accountants or personal review

11. Privacy & Security
- Encrypted data storage (AES-256)
- Biometric login (Face ID/Fingerprint)
- Local or cloud-based option

12. Optional Modules
12.1. Multi-User (Family/Partner View)
- Shared wallets for couples or family
- Permissions for viewing/editing
12.2. Investment Tracker
- Track mutual funds, stocks, crypto
- Manually or via integration
12.3. Tax Estimator
- Track tax-deductible expenses
- Simple tax calculation estimate based on income

----

7. CARBON FOOTPRINT TRACKER

1. User Management
  1.1. Authentication
- Sign up/login (Email, Google, Apple)
- Optional anonymous mode for privacy-focused users
- Role-based (Individual, Household, Organization)

  1.2. Profile Setup
- Name, location (auto-detected or entered)
- Lifestyle preferences (diet, travel habits, energy usage)
- Household or organization size
- Unit system: Metric or Imperial

2. Carbon Footprint Dashboard
  2.1. Overview
- Total carbon footprint (daily, monthly, yearly)
- Comparison to national/world average
- CO_2 emissions per category (e.g., transport, electricity, food)

  2.2. Visualization
- Pie chart: Category-wise emission split
- Line/bar graph: Emissions over time
- Color-coded: Green (low), Red (high)

3. Emission Categories
  3.1. Transportation
- Daily/weekly travel input: Car, bus, train, flights, cycling
- Fuel type & vehicle efficiency
- Integration with Google Maps or GPS for auto tracking (optional)

  3.2. Energy Usage
- Home energy consumption: kWh, gas, heating oil
- Electricity provider (renewable or not)
- Number of rooms, ACs, heaters, etc.

  3.3. Food & Diet
- Diet type: Vegan, vegetarian, omnivore
- Frequency of meat, dairy, processed food consumption
- Local vs imported food preferences

  3.4. Shopping & Waste
- Clothing, electronics, and general consumer goods
- Waste habits: Recycling, composting, landfill
- Plastic usage tracking

  3.5. Water Usage (Optional)
- Daily usage estimation
- Appliance tracking (dishwasher, washing machine)

4. Footprint Calculator

4.1. Data Collection Modes

- Quick Estimate Quiz (initial onboarding)
- Detailed form input for each activity
- CSV/Excel upload for organizational data

4.2. Carbon Conversion Factors

- Based on global standards (IPCC, GHG Protocol, DEFRA)
- Regularly updated database of emission factors

5. Goals & Reduction Plans

5.1. Personal Goals

- Set target (e.g., reduce by 20% in 6 months)
- Category-specific goals: reduce car usage, switch to LED lights

5.2. Tips & Actionable Insights

- Daily tips to reduce emissions
- Link to green alternatives (e.g., carpooling, energy-efficient products)

5.3. Impact Tracker

- "If you switch to X, you'll save Y kg CO_2 per year"
- Emission savings leaderboard or tracker

6. Analytics & Reports

6.1. Emission Trends

- Day/week/month/year analysis
- Seasonal pattern detection (e.g., heating spikes in winter)

6.2. Achievements & Progress

- Milestones (e.g., 1 ton of CO_2 saved)
- Streaks and consistent behavior tracking

6.3. Export Reports

- PDF/Excel report for personal or corporate use
- Footprint certificate (optional)

7. Community & Sharing

7.1. Social Features

- Share progress on social media
- Join groups (e.g., by college, city, company) to track collective impact

7.2. Challenges & Campaigns

- Weekly eco challenges (e.g., "no plastic week")
- CO_2 reduction leaderboards

8. Notifications & Reminders

- Reminders to log daily activities
- Nudges to check tips or reduce high-impact habits
- Monthly summary reports

9. Security & Data Privacy

- GDPR compliance
- Encrypted personal data
- Option for anonymous usage

10. Admin Panel (For Organizations or Schools)

- Manage users and teams
- Aggregate emissions across departments or locations
- Generate sustainability reports
- Track internal goals and incentives
